Table code	EC_XT_002_S2
Title	Trade Classified by Country/Economic Territory
Frequency ,Lag time and Release schedule	Frequency Monthly Lag time 1 month Release schedule The last business day of the following month
Summary Methodology • Analytical Framework, Concepts, Definitions, and Classifications • Scope of the data • Accounting Conventions • Nature of the Basic Data Sources • Compilation Practices	Foreign trade statistics refer to transactions involving movements of goods out of or into the Kingdom of Thailand over a specific time period. The figures cover all categories of goods that enter or leave the Kingdom of Thailand and pass through customs formalities at any of the Customs Houses and representative offices, either via land, sea or air transport. The data also include postal packages but do not include smuggled goods and products procured on carriers at sea. Bank of Thailand obtains electronic copy of the data and tabulates them into export and import tables. Value of exports and imports displayed in this table is in Baht equivalent as obtained directly from the Customs. Country classification is based on country of origin (for imports) and country of destination (for exports). The principle of "passive confidentiality" is applied; i.e., data would be suppressed at the request of entities who are concerned that their interests would be harmed by the level of detail disseminated.
Source of data	Customs Department, Ministry of Finance
Accessibility	BOT's website https://app.bot.or.th/BTWS_STAT/statistics/BOTWEBSTAT.aspx?reportID=743&language=ENG
Revision policy	Monthly figures of the first half of the year are revised at the end of December. Monthly figures of the entire year are revised again at the end of June of the following year.
